

First time visitors to your nonprofit website may know nothing about you. In this day when everything is all about speed, the typical visitor spends less than 30 seconds to decide the worth of your site. Pay special attention to graphics and layout to make sure you're conveying the intended message. Keep it structured, uncluttered, using easy to read fonts and use spell check!

While the list below isn't all inclusive, review your website to see if there are things you can do to improve the content quality of your website.
